GOLF PRACTISE DEVICE

This invention relates to a Golf Practise Device based on the principle of parallax.

There are many aids that can help golfers to practise and hone their game. The Golf Practise Device is a special type of golf practise aid based on the principle of parallax. The Golf Practise Device can help a golfer's game as a teaching aid which teaches the golfer to keep the head still.

No such device currently exists and there is a need for such a device so that golfers can enjoy the game of golf more and play better golf. A golfer is encouraged to keep his or her head still during practise by focusing upon the Golf Practise Device whilst hitting the ball. The golfer has to keep an eye on the Golf Practise Device during practise and this encourages the golfer to keep his or her head perfectly still. The Device is based upon the Physics principle of parallax. According to the present invention, there is provided an easy-assembly two-piece kit namely, a moulded plastic unit and an attachable wire fixing. The two-piece unit, when assembled, can be fixed into the ground or any practise area or mat. Once so fixed, the principle of parallax will encourage any golfer practising nearby to keep their head perfectly still.

A specific embodiment of the invention will now be described by way of example with reference to the accompanying drawing in which: -

Figure 1 shows, in perspective, the Golf Practise Device in position on the ground;

Once mounted on the ground a golfer stands directly above the Golf Practise Unit in such a position such that the white line cannot be seen (see Fig. 2 no. 1). The golfer then swings the golf club and tries to keep the head still so that the white line is never revealed during the swing. In this way the golfer's head can be trained into not moving during the swing. In other words, the golfer is taught to keep the head still.

There are no such devices available on the marketplace, but one could use for example a tee peg half-buried in the ground in order to help to keep the head still, by focusing on the tee peg whilst swinging the club. This method, however, would be inadequate in effective training of golfers to keep the head still *all* the time.

CLAIMS

- 1 The Golf Practise Device is a golf practise aid based on the principle of parallax.
- 2 The Golf Practise Device is a device which helps golfers to keep their heads still.
- 3 The Golf Practise Device is a device which allows golfers to focus on an object during practise.
- 4 The Golf Practise Device is a device which enables golfers to align their bodies correctly to target-line.

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 A63B69/36

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
IPC 7 A63B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	GB 1 199 822 A (BRANDELL) 22 July 1970 (1970-07-22) page 3, line 39 -page 4, line 2; figures 1-4 ---	1-4

		-/-

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

* Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family
